ABOUT MYSELF

A motivated and detail-oriented Information Technology graduate with a strong passion for software engineering and application development. Possesses a solid foundation in programming, software development, problem-solving, and analytical thinking. Adaptable and eager to learn new technologies, with the ability to work independently or collaboratively in a team environment. Committed to developing efficient, reliable, and user-centered software solutions while continuously improving technical skills.

WORK EXPERIENCE

FREELANCE | 2020-Present
Web Developer

- Developed and maintained responsive websites and web applications based on client requirements.
- Implemented frontend and backend functionalities, database integration, and API connections.
- Troubleshot issues, optimized performance, and ensured application functionality.

2NDBANANA | 2017 - 2019
Junior Software Developer

- Assisted in the development, implementation, and maintenance of software applications based on project requirements.
- Developed and improved application features while ensuring code functionality, maintainability, and reliability.
